PROFILE

MSc student in Interactive Media Technology at KTH, with a BSc in Media Technology from Södertörn University. My work sits between UX research, design and building: understanding what people actually need from a tool, designing it to fit those needs and then writing the code for it. I most recently built Arca, a full-stack budgeting app (Next.js, Node, PostgreSQL, Docker) that pulls scattered transaction data into one readable view, and before that MovieMates, a social app for deciding what to watch with a friend or partner. I also work with data visualization, including Statistically Single, an interactive web-app of complex dating app data, and with user research and evaluation, most recently on accessibility in the SL app and on how people perceive misinformation. I'm currently working with the Let's Uptech initiative at Knightec Group.

EMPLOYMENT HISTORY

- **Assistant Caretaker, Stockholm Stad, Hässelby Villastads Skola** Jun 2018 - Aug 2018
- **Associate, Biltema Mail Delivery Driver, Postnord** Oct 2020 - Mar 2021
- **Maths and Science Special Ed Teacher, Stockholm Stad, Hässelby Villastads skola** Oct 2023 - Jul 2024
- **Let's Uptech Mentor, Knightec Group** Aug 2026 - Current

EDUCATION

Uppsala Universitet
Aug 2020 — Jun 2021
Uppsala

Bachelor of Science in Medical Engineering

- Completed one academic year learning about biomedical instruments, engineering mathematics and laboratory techniques.

Södertörns Högskola
Aug 2021 — Jun 2024
Stockholm, Flemingsberg

Medical Engineering programme (one year completed)

- Bachelor of Science in Media Technology with a specialization in Game Design, focused on level design, interaction design, and project-based coursework, including extensive work on player flow, spatial UX, and user-centered design within games.

KTH (Kungliga Tekniska Högskolan)
Aug 2025 — Present
Stockholm

Master of Science in Interactive Media Technology

- Studying interaction design, data visualization, and user research across digital media.
- Built MovieMates, a social app to find the next movie to watch together (Next.js/TypeScript, Firebase Auth/Firestore) built on a fixed design system and a shared component library.
- Most recently built Arca, a full-stack budgeting web app (Next.js/TypeScript, Node/Express, PostgreSQL, Docker).
- Built Statistically Single, a data visualization project transforming complex dating statistics into a clear, interactive experience.
- Built a real-time stylized waterfall shader in HLSL.
- Currently taking User Experience Design and Evaluation, covering how experiences are designed, evaluated and critiqued across technologies, including from an accessibility and culture perspective.
- Ran user studies on topics like perception of misinformation in relation to AI and public-transit UX in regards to people with various disabilities and translated these findings into design decisions.
